

## HEALTHY SMILES ALL YEAR LONG

Oral wellness is the foundation for overall health, so regular visits to the dentist for checkups and cleanings are fundamental to making your smile last and preventing tooth decay and gum disease. Even if you don't have any symptoms, dental exams are important to make sure your teeth and gums stay healthy. And if problems do occur, they'll be easier to treat.

*It's easy to smile when you feel good. It's easier to maintain good oral health habits when you have some support. LifeSmile has the answers to your dental questions and can help keep you smiling for a lifetime.*

LifeSmile from Delta Dental can help you prevent disease and keep you on the path toward a healthier, happier life. For tips, tools and resources to help you improve and maintain your oral wellness and overall health throughout the year, make sure to bookmark [DeltaDentalKS.com](https://www.DeltaDentalKS.com).

### See Your Dentist Right Away If:

- Gums bleed often or pull away from your teeth
- Teeth are loose or separating
- You see red or white patches on gums, tongue or mouth floor
- Mouth or jaw pain persists
- Mouth sores don't heal in two weeks
- You have problems swallowing or chewing

### Help Your Dentist Help You

- See a dentist regularly. Doing so can help ensure that problems are taken care of before they become more serious and expensive.
- Choose a dentist who belongs to your plan's network. Switching from a dentist who isn't in the plan to one who is enrolled will likely save you money.
- Take advantage of any exams, teeth cleanings or X-rays your insurance may cover. Getting regular dental check-ups, such as cleanings and exams, will help prevent dental complications or worsening of dental problems such as cavities.
- Become a partner in your dental health. Tell your dentist about yourself and your concerns, and ask questions about caring for your teeth. Make sure you also understand any treatment options your dentist recommends.
